NAFEMS Announces Webinar Series: "Simulation 20/20 - The Next Five Years!"

NAFEMS announces an initiative to collaborate with a number of industry thought leaders and end-user companies to develop and deliver a webinar series titled "Simulation 20/20 - The Next Five Years!". This year-long program will offer fourteen webinars aimed at advancing the understanding, usability, and application of current and emerging CAE technologies and methodologies.

Schedule:

The series will commence on Thursday, August 27 with a webinar entitled "Democratizing CAE". This webinar will discuss how CAE Analysis is being deployed to a broadening group of users throughout product development using template-based simulation applications.

Following this webinar, NAFEMS will hold three additional webinars based on case-studies related to the democratization topic, including:

- Expert Knowledge Capture & Reuse.
- Usability.
- Accessibility.

In late-2015, NAFEMS will launch the second topic of the program with a webinar on Simulation Confidence, which will be followed by case-study webinars on:

- Verification & Validation.
- Uncertainty Quantification.
- Risk Management.
- Simulation Deployment & Governance.

The "Simulation 20/20" webinar program will conclude with webinars on Business Change and several key sub-topics, including:

- Return on Investment (ROI).
- Licensing Models.
- Communication.
- Influence of Small-Medium Enterprises (SMEs).
- Registration.
